FOREWORD

Welcome to the Create Attack 7 Content Creation Rules!

We are delighted that you are part of our project and want to share your creativity with the community. These rules have been specially developed to ensure that the content you produce is of the highest quality for both you and the entire community, and that it reflects the project in all its glory.

The project thrives on the diversity and creativity of its participants. We want to give you the freedom to realize your own ideas and projects - but at the same time, it is important to us that certain standards are maintained in order to preserve the shared experience for everyone. In particular, it is important to protect the branding and visual appearance of the project so that both you and other creators always benefit from a professional and coherent overall image.

It is important to us that you, as a creator, not only know the clear boundaries, but also receive the necessary support and inspiration to optimize your content and contribute to an unforgettable experience for the community. By following these rules, you can ensure that your content not only inspires in terms of content, but is also visually and brand-wise well integrated into the project.
